

Dear Parents of Rising Fifth Grade Math Students,

Attached is the summer work packet for Math. The packet contains 9 weeks of summer work. Please note there are **2 worksheets per week**. Although not mandatory, there will be a sweet prize for students who complete all 9 weeks of the packet!!

The **3-minute multiplication drills are the only worksheets that need to be timed**. Please have your child stop after 3 minutes, check your child's work, and write the score at the top of the page. Then have your child finish the drill. Please circle each problem completed after the 3-minute timer ends. Again, **the 3-minute drill is the only paper that must be timed**. You can disregard the time directions on any additional worksheets.

Please have your child use notebook paper or graph paper to show work as needed. Please turn in all work with the packet to receive credit for the work completed.

Please continue to practice math drills with your child throughout the summer. We do not use class time in 5th grade to review multiplication facts. Fact fluency will be a must so we can hit the ground running in the fall. I look forward to working with all of you and am so excited to meet my new crew in August. Enjoy the summer and remind your kids...**WORK HARD AND PLAY HARD!!!**

Week 6

Equivalent Fractions

Name _____ Date _____

Equivalent is another word for *equal to* or *the same*. Fractions that are equivalent are equal. They are different names for the same size parts of a whole or a group. Fractions that do not name the same size part are not equivalent.

Shade the first shape to show the fraction. Then shade the second shape so that it is equivalent. Finish the math sentence by writing the fraction for the second shape.

1.   $\frac{1}{2} =$	2.   $\frac{1}{3} =$
3.   $\frac{2}{3} =$	4.   $\frac{1}{4} =$
5.   $\frac{3}{4} =$	6.   $\frac{1}{3} =$
7.   $\frac{4}{4} =$	8.   $\frac{1}{2} =$
9.   $\frac{1}{5} =$	10.   $\frac{1}{2} =$
